Year **07/2016**
Mileage **480**
Reg: **AY16FJF**
Colour **GREY**
CC **998cc**
Stock No **5771**

That's right you did read correctly here we have a
ROAD LEGAL Kawasaki H2R!!!

This H2R was supplied and built by us here at Seastar Superbikes back in 2015/2016 for its only owner. As you can imagine this was a hell of a project costing a huge amount of money. The hardest part of the build was getting the H2R through the MSVA test without cutting into any part of the body work. However we have managed it and here is the result. The only road legal Kawasaki H2R in the UK and probably Europe.

Once the H2R had passed the MSVA test we simply took off the exhaust used to pass emission laws and refitted the racing exhaust system originally supplied we did however leave on the power commander 5 then we removed the big lights and fitted smaller strip lights and indicators and a rear view camera rather than mirrors and that's it!! 326 BHP on the road.

Think your brave enough to take this bike on then be quick as this awesome machine won't be around long.

Although this bike has been made into a road legal machine the Kawasaki Ninja H2R was not produced for the road. It was produced only for use on closed circuits and as such does not come with warranty.
